SUMMARY

Full Stack Developer focused on shipping complete web products, from database to deployment. At work I build on an ISP's internal ERP in PHP, Python and MySQL, including SAP Business One integrations. On the side I run three multi-tenant SaaS products in production with TypeScript, Next.js, Prisma and PostgreSQL on self-hosted infrastructure with Docker and Cloudflare Tunnel. Open to remote roles and freelance work.

EXPERIENCE

Junior Full Stack Developer · DTEL Telecom (internet service provider, Recife) 2024–present

- Build and evolve the ISP's internal ERP in PHP, JavaScript, Python and MySQL.
- Designed and automated the new-customer registration system.
- Built ERP integrations with SAP Business One and REST APIs.
- Automated operational routines with Python and Selenium, such as configuring router admin panels.
- Deliver reports and data analysis; maintain and tune the MySQL databases.
- Mentor trainees and uphold code standards, Git-based versioning and agile practices.

Web Developer · Eletro Solar Engenharia 2022

- Built the company website on WordPress: theme, pages, hosting and domain setup.
- Connected the site to paid traffic campaigns for lead generation.

SKILLS

Languages	TypeScript, JavaScript, Python, PHP, SQL	Back end	Node.js, Fastify, Express, FastAPI, Prisma, Drizzle ORM, REST, OpenAPI, BullMQ
Front end	React, Next.js (App Router), Tailwind CSS, WordPress	Data	PostgreSQL, MySQL, Redis, SQLite
DevOps and infrastructure	Docker, Docker Compose, GitHub Actions, Linux (Debian), systemd, pm2, Cloudflare Tunnel, libvirt/KVM	Integrations and automation	WhatsApp (Baileys), Mercado Pago, SAP Business One, Selenium, web scraping, Home Assistant, Node-RED

PROJECTS

PromoAI

TypeScript, Next.js 15, Prisma, PostgreSQL, Redis, BullMQ, Baileys, Python/FastAPI, Docker, GitHub Actions

Multi-tenant SaaS that listens to WhatsApp groups, rewrites Amazon, Shopee and Mercado Livre links with each tenant's affiliate tag and dispatches them to target groups with idempotency. Monorepo with 3 Node apps and 3 Python microservices, BullMQ queues, AI rewriting (Gemini/Groq), Mercado Pago subscriptions and CI/CD with backup and rollback.

promoai.jrkrz.xyz

Zapi

TypeScript, Fastify 5, Prisma, PostgreSQL, Baileys 7, Next.js 15, MCP, Docker Compose

Multi-tenant WhatsApp API with a dashboard, API tokens, webhooks and live session status over WebSocket. OpenAPI generated from Zod schemas and a built-in MCP server for AI agents.

zapi.jrkrz.xyz

Veículos.lat

TypeScript, Next.js 15, React 19, Prisma, PostgreSQL, Tailwind CSS 4, Cloudflare R2, Docker, GitHub Actions

Multi-store vehicle catalog: each dealership gets its own site on a subdomain or custom domain, an admin panel and server-rendered listing images (next/og + sharp) for WhatsApp sharing. Live with a pilot customer; deploys run pg_dump before migrations and support tag-based rollback.

veiculos.lat

StickerBot

TypeScript, Node.js 20, Baileys 7, Drizzle ORM, MySQL, sharp, ffmpeg, Mercado Pago, Docker

WhatsApp bot with 64 commands (stickers, group moderation, utilities) and a paid VIP plan via PIX. Started in Python in 2023, rewritten in Node and then TypeScript; Docker image published to Docker Hub on every release.

github.com/juniorkrz/stickerbot

PlacaFipy + Placa FIPE API

Python, requests, BeautifulSoup, FastAPI, Docker, GitHub Actions, PyPI, Docker Hub

PyPI library that looks up FIPE and IPVA data by license plate and converts plates to the Mercosur format, exposed as a FastAPI REST service. Auto-published to PyPI and Docker Hub on every release.

EDUCATION

Degree in Systems Analysis and Development

Faculdade Estácio

2024–2026 (completed Jun 2026)

COURSES

- Coders 24: Back-End, Ada Tech (Jun 2024, 19h)
- Embedded Software Programming for IoT, FIT Instituto de Tecnologia (Oct 2022, 20h)
- Systems Development for IoT Networks, FIT Instituto de Tecnologia (May 2022, 24h)
- CS50, Harvard (problem sets in C, 2022)

AI AND AGENTS

Work with Claude Code: agents, skills, MCP servers and multi-agent workflows. Apply Spec-Driven Development and Project Memory with ADRs in my repos, prompt engineering and critical review of all AI-generated code.

LANGUAGES

- Portuguese (native)
- English (intermediate)
